

4 STEPS TO CAREER PLANNING

Look into yourself

What are your values, interests, personality style and skills? What problems would you like to help solve? What skill sets can you offer? To become career-ready, meet with your Career Coach and attend CAO workshops to become GradREADY, InterviewREADY, NetworkREADY and BrandREADY!

Consider your career options

Now that you know your strengths and inclinations, look at potential career paths and job roles. Browse company websites, read up on job descriptions or attend career talks by organisations or professionals. Find a mentor through the NTU ConnectingMinds online community for deeper insights.

Zoom into your best career options

Focus on your targets and start sending out applications. Before that, fine-tune your strategy with your Career Coach. Meet the Career Consultant in charge of the industries you are applying for. Seek advice before an actual job interview, case study or assessment centre session.

Connect with employers

Be confident and well-prepared when you are interacting with potential employers. You can also send speculative applications to companies which you are keen on joining, or attend networking events to build professional links. Follow up with recruiters and company representatives to leave an impression.
